Teachers health insurance

I am a retired teacher of many years in Connecticut. I want to express my disappointment in the proposal to cut back on my health insurance benefit by 1/3 by the state. I think that cutting benefits of retired people who have planned their futures on these funds is breaking agreements and promises that were made in good faith years ago. Many teachers, due to low salaries, cuts to our social security earned in other states or jobs, and weak insurance plans, are really struggling to make ends meet as it is.

Please do not cut insurance benefits to teachers who have given many years of service to our state.

Sincerely, Lynn meehan
Salisbury, CT 06068
